Graded Homework Submission Guidelines

You are encouraged to discuss homework problems with your classmates, but all work submitted must be your own groups work. If multiple groups turn in identical solutions, all of them will receive a zero.

- Create a single .pdf file for each Exercise in the homework, name each file with your team members' UNIs, for example, "Ex1_ab1234_cd5678.pdf", "Ex2_ab1234_cd5678.pdf" etc.

- Write clearly your/your team members' name(s) and UNI(s) in each file.

- Include only necessary output and/or the code in your .pdf file for each exercise, and submit all your R/Python source code as another file.

- Only one member of each group should upload the homework.

- If you decide to work in a group, please do not submit your own unique homework.

Academic dishonesty: Any suspected cheating on examinations will be refered to the Dean's discipline process, possibly resulting in course failure or College dismissal.
